Life Sciences

Serving the Needs of the Life Sciences Industry

Conroy Simberg is committed to meeting the legal needs of the diverse businesses and organizations operating across the life sciences industry. We know that life science companies face a growing and constantly evolving array of legal, medical and technological issues and challenges. We also understand the complex business and regulatory pressures confronting the industry. Our attorneys work with our life sciences clients to develop solutions that best serve their legal, financial and business objectives.

Since our inception over three decades ago, Conroy Simberg has emerged as a premier civil defense firm with approximately 130 attorneys combining a broad range of legal knowledge and expertise. Our multi-disciplinary legal team is comprised of skilled attorneys focused on serving key components of the life sciences industry, including pharmaceutical companies and medical product and medical device manufacturers.

The legal professionals at our firm have decades of experience defending life sciences companies in complex pharmaceutical and medical device liability claims. We have handled a wide variety of product-related litigation, ranging from involving allegations that companies manufactured dangerous drugs and or defective products.

Crafting Strategies Aimed at Limiting Exposure

The legal issues facing the life sciences industry are highly complex and require an extensive knowledge of multi-faceted medical, scientific and technical matters. When handling a case, our attorneys take the time to fully understand our client's technology, products and business operations. We also consult with an extensive network of medical and scientific experts to thoroughly investigate and evaluate sophisticated product liability claims.

The attorneys at Conroy Simberg strive to avoid lengthy litigation by securing prompt and optimal resolutions on behalf of our clients. Our legal team also has extensive experience using mediation and arbitration to effectively resolve legal claims. When a case cannot be resolved through these methods, we are prepared to vigorously defend life sciences clients at all stages of the litigation process. We navigate clients through complex legal procedures and collaborate with them to develop approaches aimed at limiting exposure and containing the costs associated with complex litigation.

At the Forefront of Important Legal and Regulatory Developments

Conroy Simberg believes in taking a proactive approach when counseling businesses and organizations operating across the life sciences industry. Our lawyers recognize the critical importance of staying on top of legal and regulatory issues affecting our life sciences clients. We are actively involved in associations and organizations that monitor emerging laws and industry trends to ensure that our clients are aware of critical developments that may impact their operations.

Our attorneys are members of the Defense Research Institute (DRI) and the International Association of Defense Counsel (IADC), where we serve on the IADC Drug, Device and Biotechnology Committee. We combine this experience with our extensive legal knowledge to assist our life sciences clients in developing policies and procedures aimed at minimizing future liability claims and litigation.
